PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience designing and developing high-performance, distributed, and cloud-native systems using Node.js, .NET Core, and AWS. Proven ability to lead cross-functional teams and deliver complex software systems aligned with business goals. Passionate about applying customer-centric principles to deliver solutions at scale.

TECHNICAL SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, Java, C++, Python
- **Frameworks & Platforms:** Node.js, Express.js, ASP.NET Core, Next.js, React.js
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, API Gateway), Azure, Docker, Terraform
- **CI/CD:** GitHub Actions (build, test, deploy), AWS CodePipeline (familiarity)
- **Databases:** DynamoDB, PostgreSQL, SQL Server, MongoDB, MySQL
- **Architecture & Concepts:** Microservices, RESTful APIs, Serverless, Event-Driven Architecture, Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Software Developer| Education Sector Client | Surrey, BC
August 2025 – December 2025

- Architected and implemented an AI-driven quiz platform using Supabase, OpenAI, and Google Vertex AI, supporting dynamic content and image generation, with scalable attempt tracking.
- Designed database-level enforcement for quiz attempt policies (single-attempt vs. unlimited), integrating authentication workflows only when required.

- Built a modular animation and scene system supporting WebP and Lottie assets, enabling extensible gamified feedback without coupling to quiz logic.
- Owned the full software lifecycle, including schema design, API integration, UX behavior, and performance optimization.

Senior Software Developer | River4Beauty | Surrey, BC
December 2023 – June 2025

- Led development of a PHP-based e-commerce platform with custom plugins and real-time provider sync.
- Released a hybrid mobile app (iOS/Android) using Thunkable with Apple/Google login integration.
- Built a React.js + Node.js (Express) admin dashboard for tracking orders and user activity.
- Created a promotion engine with Firebase and JavaScript bridge for dynamic offers.
- Architected a notification system using ASP.NET Core for alerts and scheduling.
- Delivered scalable full-stack solutions with PHP, Node.js, React.js, and ASP.NET Core.
- Adopted emerging technologies, leveraging AI tools to optimize workflows, enhance UX, and accelerate development cycles.

Senior Software Developer | SolidCAD | Burnaby, BC
April 2022 – November 2023

- Redesigned the multi-tenant cloud deployment for **Variant**, enabling a single Design Automation Engine to support up to 100 tenants (previously one).

- Built major features and infrastructure improvements, converting CAD file generation from a static model to fully dynamic, customized CAD workflows.

- Managed cloud hosting and deployment using Azure Functions, Azure Blob Storage, and automated distribution to tenants' AWS S3 buckets.

- Developed **SolidConnect**, an advanced Autodesk Vault Extension integrating Autodesk Vault and Autodesk Inventor with PLM using Autodesk Vault API, Autodesk Inventor API, and .NET. Streamlined workflows and enhanced data management capabilities.

- Provided expert professional services to Autodesk users by creating and refining advanced extensions. Ensured seamless integration and optimization of existing services, contributing to enhanced user experience and operational efficiency.

Senior Software Engineer | STQ Dragon | Surrey, BC
March 2021 – April 2022

- Built and deployed AI-driven web applications using .NET Core and React.js.
- Designed and developed an AI-powered board game implementing Alpha-Beta pruning algorithms to create intelligent, challenging player vs. AI modes.
- Built a responsive vehicle maintenance knowledge base with advanced search and personalized features, serving as a centralized technical resource for users.
- Hosted and managed applications on AWS infrastructure including EC2, S3.

Senior Software Engineer | Agrady | Kuwait
May 2019 – December 2019

- Led end-to-end development of a cross-platform e-commerce platform, building mobile apps that reached over 10,000+ users.
- Architected the full-stack solution with a responsive front-end and robust backend integrations for a catalog of 5,000+ products.

Senior Software Engineer | STQ Dragon | Kuwait
December 2017 – May 2019

- Engineered and delivered multiple full-stack web platforms using .NET Core and React, directly increasing client engagement and market visibility across diverse industries.

- Architected an accessible web platform for visually impaired users, featuring a large audio library and social tools to improve user interaction and accessibility.

Software Engineer | B5-KW | Kuwait
January 2016 – December 2017

- Designed and developed a comprehensive archiving and document management system to store, organize, manage, and retrieve all types of files including PDF, Word, and image documents.
- Built a desktop application for lawyers using C# and Windows Forms, enabling account creation for each lawyer, case and session tracking with scheduling, pricing, billing, notes, and search functionality.
- Delivered a user-friendly, modern interface to improve workflow efficiency for legal professionals.
- Developed a GPA and academic tracking tool for Informatics Engineering students to calculate credits, grades, failed/passed courses, and track academic progress using C#.NET.
- Designed and implemented E-commerce websites using Magento, OpenCart, and Journal, combining usability with backend reliability.
- Created a virtual laboratory simulation to enhance practical learning experiences for students.

Software Developer | STE Company | Syria

August 2011 – June 2015

- Designed and implemented a fault management system for phone networks, storing faults in a database and linking them to a technician evaluation system based on resolution time and severity.
- Developed a LAN-based Android application that displays all connected devices on the same Wi-Fi network and enables voice calls between devices without using the Internet, leveraging the UDP protocol.
- Built an employee enrollment and tracking system to monitor transfers and absences across company branches, generate reports, and assist management in decision-making.
- Developed a leave management system to calculate holidays (health, administrative, unpaid) and provide accurate vacation entitlements based on employee age and start date.
- Applied strong skills in C#, Java, ASP.NET, Object-Oriented Programming, software design, and problem solving to deliver robust and reliable solutions.

EDUCATION

Bachelor of Science in Information Systems Engineering | SVU University

Dec 2009 - May 2015

Diploma in Information Processing | ATI Telecommunications Institute

Dec 2006 - May 2009

Advanced English Language Studies | KPU University.

May 2020 - Feb 2021
